

PROJECT MANAGEMENT SIMULATION

A skilled project management workforce provides a recognized advantage in an organization's ability to deliver on its mission. This one-day simulation provides a bridge from the typical classroom teaching to the application of the learning.

This learning event is a great follow-up to our project management series of classes. Whether you are preparing for certification, looking to earn continuing education credits after certification, or want to tune-up your project management skills, this simulation is an engaging and informative way to further develop your ability to confidently lead and deliver.

This course provides a case study-based project simulation that allows you to experience real-world application of project management techniques taught during our *Essentials of Project Management* and *Advanced Project Management* courses. Using case study and team-based simulation techniques, we emphasize the real-world application of project management techniques, from project kick-off to close out.

Who Should Attend

Project managers preparing for certification
Certified project managers seeking continuing education credits (PDUs)
Professionals responsible for managing projects who want to refresh their skills

Course Duration

The simulation is 1 day of hands-on, interactive learning. It can be added on to the end of any of our other project management workshops.

"PMI", "PMP", "PROJECT MANAGEMENT PROFESSIONAL", "CAPM", AND "PMBOK" ARE REGISTERED MARKS OF THE PROJECT MANAGEMENT INSTITUTE, INC.
